

Hand Pump

Product Code
GZ44191

PRODUCT BRIEF

Designed for use with media with which a regular cast iron or steel barrel pump cannot be used

Pump body is made from glass filled polypropylene with Ryton veins.

All Seals are from viton rubber & all pump hardware is Stainless Steel

Stainer fitted at the suction tube inlet stops contaminants from entering the pump

Complete with threaded polypropylene suction tube & a choice of two 2" bung adaptor for use on both plastic & metal drums of capacity 15 gallons (50 litre) - 55 gallons (205 litre)

WETTED COMPONENTS

Polypropylene, Ryton, Viton & Stainless Steel

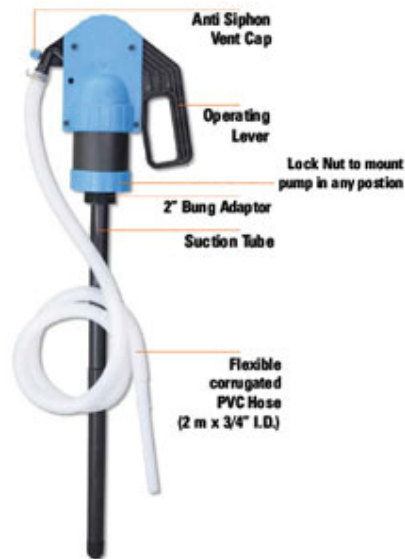

RECOMMENDED USE

For dispensing water based media, antifreeze, acids, chemicals etc; in addition to use with all petroleum based products.

DO NOT USE

With Acetone, Lacquer, Mineral Oils, Solvents, Turpentine etc.

Product Code
GZ44185

PRODUCT BRIEF

Lever Action Barrel pump, designed specifically for use with high viscosity oils.

Pump design makes it extremely convenient & comfortable to pump thick oils without excessive fatigue.

Choice of materials used in the pump construction, make it versatile for use with water based media, as well as select chemicals.

Pump outlet is fitted with an Air Vent Cap which when loosened breaks the Siphon action.

Supplied complete with suction tube for use with 15- 55 gl (50-205 Litre) drums & 2m x 3/4" Flexible Corrugated discharge hose.

WETTED COMPONENTS

Polyacetal, Polypropylene, Polyethylene & Viton

FOR USE WITH

Water-based media, detergents, soaps, antifreeze, windshield washer, Hydraulic Oils, Lubricants, Herbicides & Pesticides. Pump should only be used with Non-Inflammable liquids

DO NOT USE WITH

Any media not compatible with materials used in the pump construction. These pumps must never be used for Fuel Transfer or with Thinners, Solvents etc.
