

Meters

K33
000550
3 digit meter. Can be used with or without pump

K44
000560
4 digit meter. Can be used with or without pump

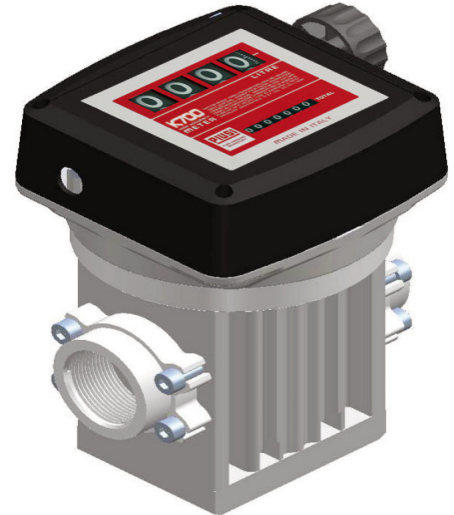

K24
F00407010
Inline turbine digital meter c/w 1" female ports, reinforced polyamide body and flow rate indication.

K600
F00496A0
Digital oval gear meter c/w 1" female ports and accuracy of +/- 0.5%

K700
F005400 Mechanical Meter
Flow rates from 20 to 220 ltr/min
1 1/2" BSP female ports.
Accuracy +/- 1%

K200
F0043012A
Low flow in-line meter, suitable for domestic heating. Flow rates from 0.1 ltr/min to 2.5 ltr/min

MC BOX SYSTEM

F13980000

80 user

F13980050

120 user

The MC box fuel panel has the capability to control and manage the consumption of fuel for the private and commercial sector. Its intelligent design allows the unit to be easily connected or added to both new and existing pumps providing low cost, simple, easy to use fuel management.

The control panel has the ability to:

- Switch a pump on/off
- Recognize authorised users by means of i-button key or pin code
- Preset a quantity to dispense
- Manage a pulse meter to measure quantity dispensed
- Manage an external level switch to control pump operation on low level
- Operate an external nozzle switch
- Connect to a PC for exporting data files
- Connect to an external printer

The system is easy to install and has excellent weather resistance. The wiring connections are located in an easy to access electric

ACCESS 85

F00702

An electronic unit for the smart control of the withdrawal of fuel from tanks by numerous users. It is able to control pump stop and start, user access by means of an electronic key. It also features an emergency stop button.
