## Haaga 696

The Haaga 696 is the only sweeping machine with motorized and manual operation. It is always ready for use even with discharged battery! The motorized broom drive ensures maximal cleanliness even in the edges and is extremely easy to push. The machines sweep in wet and dry leaves, stones and cans thoroughly and efficiently. Optimal container filling is obtained thanks to the overhead sweeping roll. Variable sweeping pressure of the circular brooms and the sweeping roll with the push of one button.
